

DID YOU KNOW?

Kern County OIL & GAS ENVIRONMENTAL IMPACT REPORT

Kern Citizens for
Energy

This process will result in a reliable local permitting structure for decades to come.

Kern County currently produces 80% of the oil and gas in California. Upon approval and implementation, this local permitting structure will result in unprecedented additional environmental safeguards and community benefits for the people of Kern County.

A streamlined permitting process will boost our local economy, allow our oil industry to continue production and contribute

\$4 billion
in income for Kern
County families
each year

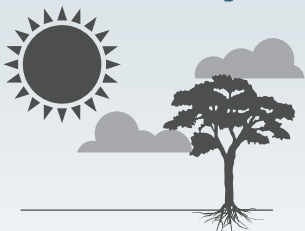

50,000
local jobs

\$1.2 billion
in state and local
tax revenue

Unprecedented Additional Environmental Safeguards & Community Benefits

Once this permitting structure is implemented, the industry will be required to contribute hundreds of millions of dollars for additional environmental safeguards and community benefits over the twenty-year life of the program. Just a few examples:

Air Quality

The industry is committing to tens of millions annually to go toward new air emission reductions in the Valley

Roads

The industry will be required to contribute up to \$60 million in road improvements for critically needed Kern County transportation projects

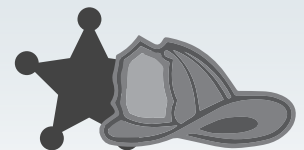

Water

The industry will work with agriculture producers and water districts toward long-term groundwater sustainability

Public Safety

The industry will provide new fire equipment, strengthening Kern County fire protection

The industry will contribute millions of dollars to provide for staff and resources to the Sheriff's Rural Crime Investigation Unit (RCIU)
